Make a Glacier in your Freezer

Tonight when you get home:

1. Find a glass jar with a tight fitting lid.
2. Fill the jar completely to the top and screw the lid on tightly.
3. Put the jar in a paper bag and seal the top (don't skip this part or your mom or dad will be MAD!)
4. Put the bag in your freezer over night.

In the morning:

1. Carefully open the bag and look, write down anything you notice.
2. Bring the bag and jar to school with you. (You might need to put them in a plastic bag.)

What did you notice?

Why do you think this happened?
