

## **Data Disk Cover Instructions**

The cover of your data disk must state the following information across the data disk:

(Your name)'s Data disk of (Explorer's Name)

For example:

*Fred's Data Disk  
of  
Prince Henry the Navigator*

- The words of the title should be spelled correctly (of course!) and should be outlined with a black fine-tipped marker.
- Draw a related illustration and color it neatly with colored pencils or thin markers. The more the disk is colored, the better.
- Outline important contents with a black fine-tipped marker.
