

EVALUATION OF YOUR HOME GROUP

	Excellent	Good	Fair	Needs Improvement
Group Cooperation	Everyone worked together using his or her abilities and knowledge to make the project come together	We worked together so that everyone had a fair share of the work	We worked together most of the time, sharing information regularly	We did most of the work by ourselves, we talked a little among our group members
Distribution of Group Tasks	Work was shared fairly according to the abilities and interests of the members	We divided up the work equally.	Everyone had a job to do but some jobs were not done as well as others	Some of us did most of the work
Group Leadership	We had a leader who helped us organize and stay on task till the job was complete	One person took a leadership roll and gave good directions that kept us going	No one person was a leader so we usually helped each other get the job done	We had no leader so we just did our own thing
Communication among group members	We talked all the time and shared our work for group feedback	We usually asked each other for help and showed our work to each other	We sometimes got together and talked about what we were doing	We only talked when we thought we needed to, but got little feedback
Individual Participation	Everyone did a great job, I would work with these people again	We all seemed to find our place and do what was needed	Each person did some work tried to do a fair share	A few people tried very hard, but most didn't do much.
Listening to other points of view	Everyone listened to each other a lot, and used what we heard to improve our work and the whole project	We listened while others were talking and we learned about their viewpoints from that	We usually listened to each other and tried to use what they said in the project	We usually heard what others were saying but some of us made it difficult.
Showing Respect	We were all courteous and valued each other's opinions	We didn't talk over each other or argue	We allowed each other some space and let them do their part	We usually didn't get in each other's way.
Rate Your Experience of this Group Project	It was a valuable and realistic way to learn. My group was great	I liked learning this way and would probably try it again	I learned that group work can sometimes be helpful	I would rather work alone.
